

Individual spitting protection acrylic

Application example: ASEAG sales and information desks

Protect your customers and your employees! Protect your business!

Stable spitting protection made of acrylic glass, which is assembled by a simple and safe plug connection.

The assembly takes place without drilling, screwing or gluing and can be done by yourself.

After use, the spitting protection can be removed without leaving any residue and can be stored in a space-saving manner.

We manufacture individually for you! The individual conditions, the required functions and the general appearance of your company are taken into account.

We only use high-quality materials to ensure that your investment in hygiene and protection is sustainable.

Guaranteed short-term production and delivery!

**Design, planning, production, logistics, assembly
from Aachen for all of Europe [meraum.de](https://www.meraum.de)**

Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Implementation

Our own success is closely linked to that of our customers. We are aware of this and understand how important it is. This is why we always focus on the factors that make our customers successful. The first and most important step in each project is to listen to their needs and to try to understand their goals. A professional exhibition stand construction firm must be able to come up with a good design and to implement high-quality and technically sound solutions.

What sets us apart is that we see it as our duty to provide our customers with a sense of security: the security that every customer needs in order to know that their pressing tasks, which are critical for success, are in good hands.
