### INFORMATIVE AND TANGIBLE

As a supplier for the solar industry, AGC Glass is doing business in a very competitive market. The company headquartered in Belgium has positioned itself as a provider for the processing industry.

## Intersolar 2012

(7 x 9 m)

AGC Glass places a lot of importance on ensuring that its products and applications are presented in an informative and tangible way at their trade fair exhibitions. To make its range of products really come alive, we have developed a concept for their stand where different modules can be integrated. The concept for the design, which is clearly structured and has a high recognition value, is consistently applied at every event. In this way the company can react flexibly and economically to the different requirements for each trade fair.

## Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
