IBC 2012

(11 x 5 m)

Over the past several years we have created appealing exhibition stands for the company, which clearly illustrate the complex subject matter of the company's products. The elaborate graphical concept combined with the high-quality components for the stand construction convey the message that this is a stand from a high-tech company. The pleasant atmosphere is underscored by the stand's well-thought-out lighting concept and attractive furniture.

Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
