(5 x 5 m)

### ELEGANCE AND PRECISION

The stand which we designed for Philips is small but powerful. It fulfils all of the company's requirements with its harmonious and finely-tuned design. One good example of our dedication to detail – which is always a fundamental part of designing exhibition stands – is the chandelier made out of bicycle lamps that we developed especially for this stand.

## Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
