CLEAR FORMS, WELL-MATCHED PROPORTIONS AND ATTENTION TO DETAIL

RheinZink has been producing titanium zinc sheet metal products meant for roof drainage, roofing and façade cladding for more than 45 years – all around the world. RheinZink sees itself as a partner of architects and skilled tradesmen alike. Those who know RheinZink will recognize this stand.

We systematically applied the corporate design in our stand concept: clear forms and well-matched proportions characterize the architecture of the stand, while carefully thought-out presentation elements and individually designed conference zones show our loving attention to detail. This is how Rheinzink uses its exhibition stands to present itself as a company that is still down-to-earth while being highly innovative at the same time.

Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
