### CLEAR LINES FOR PRECISION PRODUCTS

Rodriguez GmbH is a leading supplier of thin-section bearings, precision roller bearings, special bearings and linear technology. As a supplier, including for example aviation and aerospace engineering, the Rodriguez company focused on precision, reliability and a clear strategy.

Lightness and transparency, combined with reliability and precision are passed by the stand during the short duration of the event. In cooperation with the customer, we plan and implement the stands of Rodriguez and appreciate the valuable, long-term cooperation.

In 2015 the appearance at the fair by Rodriguez was redesigned in terms of product presentation.

Instead of products being displayed as until now on tables and pedestals, MeRaum designed several bilateral presentation walls. The vertical layout gives the viewer easy access to the technical products with drawings and descriptions. Due to the sequence of the presentation elements they integrate perfectly the existing architecture of the stand.

## Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
