

PLAST-CONTROL

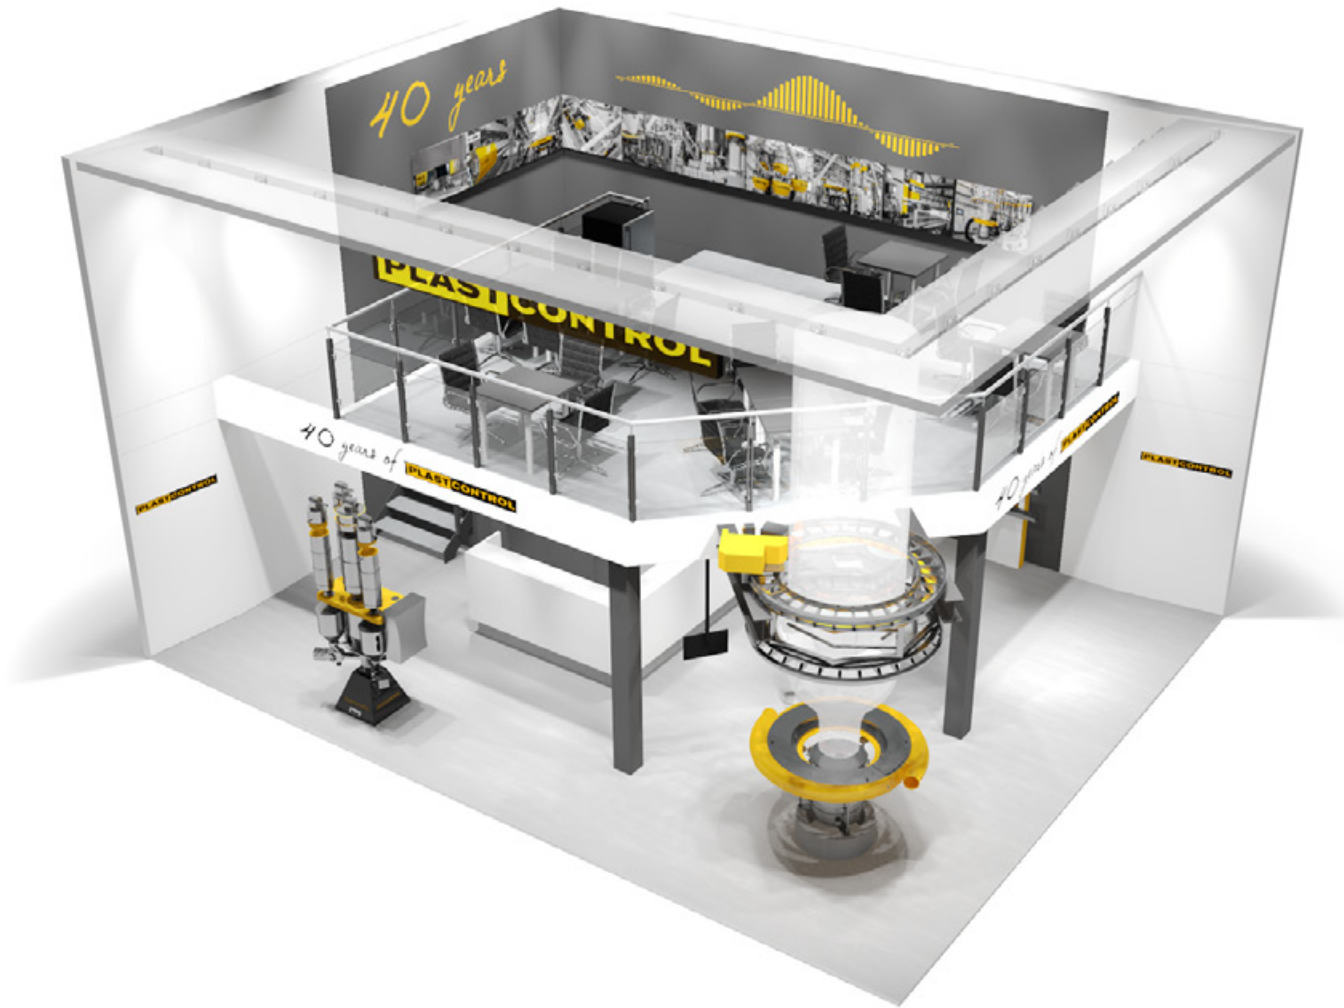

K 2019

(10 x 8 m)

DOUBLE-DECKER WITH A VIEW
Customer | Our longstanding customer PLAST-CONTROL is a leading producer of automation systems for the plastics industry. Therefore, it is essential for the company to have an exhibition stand at "K", the world's most important trade fair for the plastics and rubber industry.

Since 2007, PLAST-CONTROL has been present at the trade fair with a double-decker exhibition stand designed by MeRaum.

PLAST-CONTROL

K 2019

(10 x 8 m)

Execution | A two-story structure has proven to be ideal, particularly due to the size of the exhibits. The eye-catching exhibit can be seen from both the ground and upper floors.

Result | The MeRaum team's expertise and experience in designing, constructing and assembling double-decker exhibition stands have once again resulted in a successful trade fair appearance at the "K 2019" as well as a very pleased and satisfied customer.

Temporary architecture for long-lasting brand success. Stand construction in Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
