PRESENCE AND LIGHTNESS

We came up with a powerful and dynamic stand design for Andritz Metal's exhibition stand in 2014. We started with the idea that corporate values should also be reflected in the stand's architecture. An illuminated ceiling sail in the shape of a cube really gives the stand its look and ensures that the company has maximum presence. The stand's space is also characterised by the tilted cubes, which conjure up associations with huge aluminium blocks.

The indirect presence and the light manner in which the material is handled emphasizes Andritz's image of being a globally active company. Since we were able to get the Andritz Metal group enthusiastic about the new Corporate Identity for their Trade-Fair stands, they are planning to take it over for their shows in the future.

Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
