## Electronica 2012

(14,5 x 8,5 m)

The stand at the Electronica 2012 is characterized by its plain and elegant architecture, which is broken up by the orange of the glass façade. LED screens and showcases are integrated in this glass façade. Detailed product presentations take place at the periphery and lead into the interior of the stand, where further talks can be held at bar tables and lounge seating arrangements.

## Electronica 2012

(14,5 x 8,5 m)

The combination of individual components and a high-quality system structure allows the existing concept to be adapted to various stand sizes.

## Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
