

Saint-Gobain PAM

IFAT 2012

(20 x 16 m)

FRENCH CAFÉ AT THE ARCHWAYS

The company Saint-Gobain PAM Deutschland GmbH is the largest provider of ductile pipe systems in Germany. It manufactures high-quality products for water supply and sewage disposal systems in its modern factory in Saarbrücken and sells its products around the world.

The Saint-Gobain Group's logo is a bridge, which is a trademark with which every trade visitor is familiar. PAM presented its specific range of products under the Saint-Gobain umbrella brand. The park-like landscapes offered a lovely space for presenting the products in detail. Inside the stand there was a French market square café under the archways of the bridge. The architecture of the stand was a nice way to bring together the group's corporate objectives in a cosy atmosphere.

Since 2005 MeRaum has been devising exhibition stands for Saint-Gobain PAM that promote the company's image and communications. The concepts are always designed and planned for use at three trade fairs and are then constructed by us.

Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
