

SWISSPACER

Fensterbau Frontale 2014

72 m², 8 x 9 m

SIMPLE. DISCRETE. EFFICIENT. SWISSPACER was founded in 1998 and is part of the Saint-Gobain Group. The company does business around the world and is the market leader in several countries. Its headquarters are in Switzerland. The product SWISSPACER is a spacer grid used by most of the insulation glass manufacturers in Europe. This product makes a considerable contribution to heat insulation in a simple, discrete and efficient way. The concept for its exhibition stand is characterised by its discrete understatement and its uncompromising style. Individual details are also not in short supply.

SWISSPACER

72 m², 8 x 9 m

The products are used as eye-catchers so that the stand can be seen from far away and they also serve as space dividers. SWISSPACER is one of several companies in the Saint-Gobain Group for which we have worked over the years. We are proud that we have been able to demonstrate our expertise in designing and building exhibition stands, time and time again.

SWISSPACER

Fensterbau Frontale 2014

72 m², 8 x 9 m

Temporary architecture for long-lasting brand success. Stand construction from Aachen for all of Europe.

Design – Planning – Realization

Our own success is closely linked to that of our customers. This is why we always focus on those factors that make our customers successful. The first and most important step in each project is to listen and to understand the goals. Good design as well as a high-quality and technically sound solution are a must.

What makes us different is that we see it as our duty to provide security for our customers. The security each customer needs, to know that his pressing tasks that are critical for success are in good hands.
